3. Cross-Modal Inconsistencies & Contradictions

[CONFLICT] Contradiction (Severity: Critical (Priority Reference #1))

Details: PRIORITY REFERENCE #1: Consumer file narrative claims 'I was stationary at a red traffic signal when a trailing commercial taxi failed to br...', whereas Official Police General Diary (GD-001/2026 - Indiranagar Traffic Police Station) records dynamic moving collision with conflicting damage locus and driver divergence at scene.

Materiality: Fundamental (Primary Reference) - Direct factual mismatch between consumer sworn declaration and official police station record.

Recommended Resolution: Request certified Station GD folio from Indiranagar Traffic Police Station and examine attending officer.

4. Multi-Hypothesis Accident Reconstruction

Reported Stationary Rear-End Impact — *Support Level: Highly Supported (Prob: 94%)*
• **Summary:** Vehicle was stationary at traffic signal and struck squarely by trailing vehicle, entirely consistent with physical deformation and police report.
• **Assumptions:** Braking distance of trailing vehicle insufficient on wet pavement
