3. Cross-Modal Inconsistencies & Contradictions

[CONFLICT] Contradiction (Severity: Critical (Priority Reference #1))

Details: PRIORITY REFERENCE #1: Consumer file narrative states 'Car flew out of road went into sweet shop and destoyed all loddoo counters...', whereas Official Police General Diary (GD-482/2026 - Indiranagar Traffic Police Station) records 'Police GD extract records two-vehicle impact in active traffic lane with frontal deformation observed; divergence from driver initial statement.', documenting an immediate factual discrepancy between sworn consumer declaration and official police station extract.

Materiality: Fundamental (Primary Reference) - Direct factual mismatch between consumer's sworn declaration and official police file.

Recommended Resolution: Request certified Station GD folio from Indiranagar Traffic Police Station and conduct recorded examination of driver and attending officer.

4. Multi-Hypothesis Accident Reconstruction

H1: Incident as Stated in Consumer Notice of Loss — *Support Level: Moderate Support (Prob: 42%)*
• **Summary:** Collision occurred precisely as reported by claimant (Rear-End Collision). Discrepancies in police GD reflect delayed officer arrival.
• **Assumptions:** Police record contains clerical time lag

H2: Divergent Moving Collision Documented in Police File — *Support Level: Strong Evidence of Divergence (Prob: 58%)*
• **Summary:** Official Police Station GD extract accurately captures multi-vehicle dynamic collision and secondary damage not disclosed in consumer intake.
• **Assumptions:** Attending officer inspected physical roadway skid marks and damage vectors at scene
